PROFILE

Adaptable and collaborative Front End Engineer with 6+ years of experience building performant, accessible, and user-friendly web and mobile applications. Proven ability to improve SEO, performance, and maintainable UIs using modern JavaScript frameworks and tooling. Seeking to leverage my skills to contribute to impactful user interfaces and delightful customer experiences.

SKILLS

Languages

HTML, CSS, JavaScript, TypeScript

Technologies

React, Next.js, React Native, GraphQL, Tailwind CSS, Jest, React Testing Library, vitest, Storybook, DatoCMS, Contentful,

Others

Web Performance Optimization (WPO), Web Accessibility (WCAG), CI/CD, Git, SCRUM and Agile Methodology

PROFESSIONAL EXPERIENCE

Senior Software Engineer

11/2023 – 2026

Giant Eagle GCC

Bangalore

- Contributed to the development and maintenance of the **Getgo mobile application** built with **React Native**, delivering new features and resolving defects to improve application stability and user experience.
- Enhanced the **Getgo web application** by developing and maintaining multiple UI components and resolving **accessibility issues**, enabling the application to meet compliance standards and successfully obtain an **accessibility compliance certification**.
- Developed key features for a **Grocery Kiosk application**, including **product filtering and search functionality**, improving in-store usability and customer navigation efficiency.
- Played a key role in multiple **Pharmacy platform initiatives**, including:
 - Building a **customer-facing Immunization Portal** using **Next.js**, leveraging **Next.js API routes** to handle backend integrations for vaccine and immunization requests.
 - Developing a **Pharmacist Portal** to manage immunization requests at the store level, support vaccine administration workflows, and streamline operational processes.
 - Contributing to the initial development of a **Pharmacy Configuration Portal**, implementing core components to manage vaccine configurations, patient screening requirements, and related clinical information.
- Designed and developed a **reusable React component library** adopted across multiple projects within the organization, ensuring consistent **branding, theming, and UI standards**, while reducing development effort and improving code reuse.

Software Engineer

07/2019 – 11/2023

Y Media Labs

Bangalore

- Developed a product design page for Polestar 2 (an electric car brand) for both desktop and mobile. Complex animations and innovative design resulted in +88% time on site, +111% Session duration, -59% bounce rate.
- Developed a completely accessible web components library for Mayo Clinic driven by tokens, using stencil.js along with storybook.
- Worked on Avenue One project revamping their website using Next.js with data driven from Contentful CMS.

- Worked on MEP project, a program to have information of companies and construction projects in one place for contractors and MEP users. Built a filter feature with complex selection logic filtering out the construction projects based on multiple criteria.
- Worked on an internal project building a Messenger application using React, Node.js, MongoDB.
- Worked on creating a Home configurator and couple other real-time immersive 3D visualization using Unreal engine.

EDUCATION

Information Science and Engineering

PES Institute of Technology

7.98 CGPA

2015 – 2019

Bangalore, India
